- Custom printed and digital cut 1/2" gatorboard

Project: Promotional display with single shelf

- Custom printed white ultraboard
- Digital cut to shape and assembly

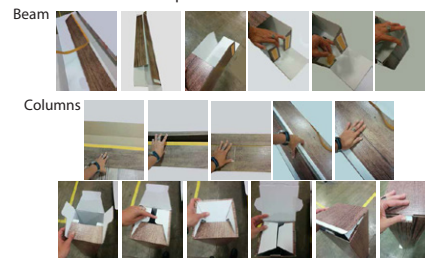

*the*  
**LoweMartin**  
Group

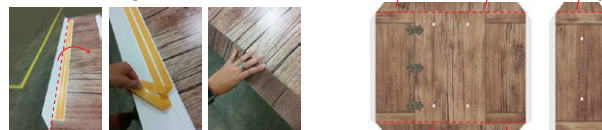

1. Prefold all the scores well on all the components
2. Assemble ALL the columns and the top beam

3. Assemble front and sides of the bar.
  - a) Adhere ONLY the TOP flaps and apply pressure for the double sided tape to adhere well to create clean edge for the bar.

- b) Align all the sides of the bar with the FRONT AND BACK COLUMNS creating a U shape bar. Adhere keeping the flaps inside the bar (match no ink areas to each other)
  - c) Insert the TOP BEAM on top of the tall front columns
  - d) With the 1" foam blocks assemble all the log-ons to the sides, front and top of the bar.

Final Product
